

● **NOTE:** Is documentation me **User Clinic Booking & Checkout System** ke sabhi **Paanchon (5) APIs** ka complete specification diya gaya hai. Isme **Teeno Care Tiers (OPD Consultation, IPD Admission, Emergency / Triage with Ambulance & Support Staff)**, **Dual Payment Modes (COD & Razorpay Online)**, **Live COD Policy Check (isCodAvailable)**, aur **Live Booking Tracking** shamil hain.

## PART : User Clinic Checkout & Care Booking API Specification

- **Base URL Path:** `/api/clinic/checkout`
- **Access Level:** `protect('user')` (Protected Customer Access)
- **Common Headers Required:**

codeHttp

```
Authorization: Bearer <jwt_user_token>
Content-Type: application/json
```

### 1. Calculate / Preview Clinic Bill Breakdown

Appointment ya admission confirm karne se pehle real-time price breakdown (Doctor Consultation Fee, Multi-day Bed Stay Charges, Ambulance Ride + On-board Nurse/Doctor Fees, aur Coupon Discounts) calculate karne ke liye.

- **Full Endpoint URL:** `POST /api/clinic/checkout/calculate`
- **HTTP Method:** `POST`

#### Request Body Parameters (JSON)

| Parameter Key                | Data Type                      | Status            | Description / Constraints / Examples                                                                                                 |
|------------------------------|--------------------------------|-------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| <code>clinicId</code>        | <code>String (ObjectId)</code> | ● <b>Required</b> | Clinic Facility ki MongoDB ObjectId<br>(E.g. <code>"6a7d99429438532bd566a714"</code> ).                                              |
| <code>bookingType</code>     | <code>String</code>            | ● <b>Required</b> | Care category tier: <code>'OPD'</code> , <code>'IPD'</code> , ya <code>'EMERGENCY'</code> .                                          |
| <code>doctor</code>          | <code>Object</code>            | ● <b>Required</b> | Selected Attending Specialist info object ( <code>{ "doctorId": "...", "mode": "Video Consult", "fee": 500 }</code> ).               |
| <code>doctor.doctorId</code> | <code>String (ObjectId)</code> | ● <b>Required</b> | Doctor ki MongoDB ObjectId.                                                                                                          |
| <code>doctor.mode</code>     | <code>String</code>            | ⚠ <b>Optional</b> | Consultation mode: <code>'clinic'</code> (In-Clinic), <code>'video'</code> (Video Call), ya <code>'home'</code> (Doctor Home Visit). |
| <code>ward</code>            | <code>Object</code>            | ⚠ <b>Optional</b> | Inpatient Bed Details ( <i>Zaroori for IPD &amp; Emergency Bed booking</i> ).                                                        |
| <code>ward.bedId</code>      | <code>String</code>            | ⚠ <b>Optional</b> | Selected Bed ID (E.g. <code>"bed_s03"</code> ).                                                                                      |
| <code>ward.wardName</code>   | <code>String</code>            | ⚠ <b>Optional</b> | Ward title (E.g. <code>"Observation Ward"</code> , <code>"ICU Ward"</code> ).                                                        |

|                                     |               |                |                                                                                                                                               |
|-------------------------------------|---------------|----------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| <code>ward.pricePerDay</code>       | Number        | ⚠️<br>Optional | Per day bed fee in ₹ (E.g. <code>600</code> ).                                                                                                |
| <code>ward.startDate</code>         | String (Date) | ⚠️<br>Optional | Admission date ( <code>YYYY-MM-DD</code> ).                                                                                                   |
| <code>ward.endDate</code>           | String (Date) | ⚠️<br>Optional | Discharge date ( <code>YYYY-MM-DD</code> ).                                                                                                   |
| <code>ward.totalDays</code>         | Number        | ⚠️<br>Optional | Total days count of inpatient stay (E.g. <code>1</code> , <code>10</code> ).                                                                  |
| <code>ambulance</code>              | Object        | ⚠️<br>Optional | Emergency Ambulance dispatch details ( <i>Optional for EMERGENCY tier</i> ).                                                                  |
| <code>ambulance.ambulanceId</code>  | String        | ⚠️<br>Optional | Ambulance vehicle ObjectID.                                                                                                                   |
| <code>ambulance.rideType</code>     | String        | ⚠️<br>Optional | <code>'ONE-WAY RIDE'</code> (₹400) ya <code>'ROUND-TRIP'</code> (₹700).                                                                       |
| <code>ambulance.supportStaff</code> | Object        | ⚠️<br>Optional | On-board medical staff addons ( <code>{ "nurse": { "selected": true, "price": 300 }, "doctor": { "selected": true, "price": 700 } }</code> ). |
| <code>couponCode</code>             | String        | ⚠️<br>Optional | Promo discount coupon code.                                                                                                                   |

### 🏠 Sample Request Payload 1: OPD Video Consultation

codeJSON

```
{
  "clinicId": "6a7d99429438532bd566a714",
  "bookingType": "OPD",
  "doctor": {
    "doctorId": "6a991a3d3c70a54b1cb0600a",
    "mode": "Video Consult",
    "fee": 500
  }
}
```

### 🏠 Sample Response (200 OK - Exact Output)

codeJSON

```
{
  "success": true,
  "bookingType": "OPD",
  "clinic": {
```

```

| Parameter Key                  | Data Type           | Status        | Description / Constraints / Examples                                |
|--------------------------------|---------------------|---------------|---------------------------------------------------------------------|
| <code>appointmentId</code>     | <code>String</code> | ●<br>Required | Clinic Booking MongoDB <code>_id</code> ya <code>bookingId</code> . |
| <code>razorpayOrderId</code>   | <code>String</code> | ●<br>Required | Razorpay Order ID (E.g. <code>"order_TWKZ81920sLkd"</code> ).       |
| <code>razorpayPaymentId</code> | <code>String</code> | ●<br>Required | Razorpay Payment ID (E.g. <code>"pay_987123612"</code> ).           |

|                   |        |                                                                                            |                                           |
|-------------------|--------|--------------------------------------------------------------------------------------------|-------------------------------------------|
| razorpaySignature | String |  Required | Cryptographic HMAC-SHA256 signature hash. |
|-------------------|--------|--------------------------------------------------------------------------------------------|-------------------------------------------|

#### Sample Request Payload

codeJSON

```
{
  "appointmentId": "6a9821a034afe0ff4cb661aa",
  "razorpayOrderId": "order_TWKZ81920sLkd",
  "razorpayPaymentId": "pay_987123612",
  "razorpaySignature": "e3b0c44298fc1c149afb4c8996fb92427ae41e4649b934ca495991b7852b855"
}
```

#### Sample Response (200 OK)

codeJSON

```
{
  "success": true,
  "message": "Payment verified successfully & clinic booking confirmed!",
  "data": {
    "_id": "6a9821a034afe0ff4cb661aa",
    "bookingId": "CLN-ORD-749201",
    "status": "Confirmed",
    "paymentMethod": "Online",
    "paymentStatus": "Paid",
    "totalAmount": 900
  }
}
```

## 4. Get User's Clinic Bookings (List View)

User ke sabhi past aur active clinic appointments/admissions ki list retrieve karta hai.

- Full Endpoint URL: `GET /api/clinic/checkout/my-bookings`
- HTTP Method: `GET`

#### Query Parameters (Optional)

| Parameter Key | Data Type | Status                                                                                       | Description / Constraints / Examples                                                                                          |
|---------------|-----------|----------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| status        | String    |  Optional | Status filter<br>( <code>'Pending'</code> , <code>'Confirmed'</code> , <code>'Completed'</code> , <code>'Cancelled'</code> ). |
| bookingType   | String    |  Optional | Type filter<br>( <code>'Appointment'</code> , <code>'Admission'</code> , <code>'Emergency'</code> ).                          |

 **Sample Response (200 OK)**

codeJSON

```
{
  "success": true,
  "count": 1,
  "data": [
    {
      "_id": "6a9821a034afe0ff4cb661aa",
      "bookingId": "CLN-ORD-749201",
      "bookingType": "Appointment",
      "consultationType": "Clinic Visit",
      "status": "Confirmed",
      "paymentStatus": "Paid",
      "totalAmount": 900,
      "clinicId": {
        "_id": "6a7d99429438532bd566a714",
        "clinicName": "Mudabir's Clinic",
        "city": "Mohali",
        "image": "/uploads/clinics/clinic-1788593466921.jpeg"
      },
      "doctorId": {
        "_id": "6a991a3d3c70a54b1cb0600a",
        "name": "Dr. Mudabir Kowsar",
        "speciality": "Cardiologist",
        "profileImage": "/uploads/doctors/clinic-doc-1788418620704.png"
      },
      "appointmentDate": "2026-09-08T00:00:00.000Z",
      "appointmentTime": "11:00 AM",
      "createdAt": "2026-09-08T05:30:00.000Z"
    }
  ]
}
```

**5. Get Single Clinic Booking Full Details & Tracking**

Order ya admission pass ka poora live detailed view load karne ke liye (Attending specialist info, Inpatient bed duration, Ambulance vehicle details with on-board staff, symptoms, aur payment breakdown).

- **Full Endpoint URL:** `GET /api/clinic/checkout/booking/:id`
- **HTTP Method:** `GET`

 **Path Parameters**

| Parameter Key | Data Type | Status                                                                                       | Description / Constraints / Examples |
|---------------|-----------|----------------------------------------------------------------------------------------------|--------------------------------------|
| id            | String    |  Required | Booking ID                           |

|  |  |  |                                                             |
|--|--|--|-------------------------------------------------------------|
|  |  |  | (E.g. "CLN-ORD-749201")<br>ya<br>MongoDB<br>Document<br>id. |
|--|--|--|-------------------------------------------------------------|

### Sample Response (200 OK - Full Emergency Admission View)

codeJSON
